

VAMPIRE 4

Official launch!

STANDALONE AMIGA COMPATIBLE COMPUTER

The “Amiga34 Bundle”

People attending Amiga34 will be the first to be able to buy the Vampire V4 Standalone. For that special event, we wanted it to be even more special by gifting some goodies for the price of the normal bundle.

Standard bundle is made of **Vampire V4 Standalone** board shipped with AROS kickstart, **aluminum case** and **PSU**. The Amiga 34 bundle includes as free gives-away a **Gaming Mouse**, a **Gaming Keyboard**, a **CF-Adapter**, a **32GB CF card** and an **USB Blaster**. With all that, you will be ready to start!

Price of the bundle is 549€

Current state of Standalone core

- **Ethernet:** work is in progress, driver is being written.
- **USB:** support for some input devices like USB mice and keyboards. Support for more is in progress. Compatibility list available on Wiki.

https://wiki.apollo-accelerators.com/doku.php/compatible_v4

- **Joystick :** Status support of AMIGA Joy (like Competition Pro)
- **OCS/AGA:** Many games and demos work perfectly, but not 100%.
- **Boot drives:** boot from IDE/CF, microSD card for data exchange. Bootable microSD in roadmap.

Be part of that revival by helping us test latest developments and continuous improvements.

We are looking forward for your reports!

Terms & Conditions

- Payment can be made in cash or via PayPal during the event
- One unit per person. Adding yourself a mustache does not make you another person.
- Offer is available until stock remains, even regarding accessories
- No support is offered on accessories
- Complete warranty terms available on our Wiki
