

Vampire 500 V2

The Vampire 500 V2 developer board.

Signature

- **Target:** Amiga 500 rev3, 5, 6a, 8 and Amiga 2000 (connects to the CPU socket)
 - Connecting to a **CPU slot** adapter on the Amiga 2000 is not officially supported. [more info...](#)
- **Designer:** [Majsta](#)
- **Manufacturer:** Kipper2K
- **Release Date:** 2016

Specifications

- **FPGA:** Altera Cyclone III
 - **CPU:** [Apollo 68080 Core](#)
 - **Memory:** 128 MB FastRAM
 - **Chipset:** [SAGA Core](#)
 - **Internal Ports:**
 - 44-pin IDE Interface
 - JTAG Socket
 - **External Ports:**
 - Digital Video Out
 - MicroSD Card
-
